Normal Interiors

The traditional business mode focuses on per-square-foot pricing, which often leads to the use of lower-cost materials to keep prices down. While this approach may seem economical, it can compromise the quality and durability of finishes.

Execution Model

At Interior Studio, we adopt a different approach

Client Chooses and Pays Vendors Directly

Clients select materials and products and pay vendors directly, giving them full control over material quality and cost.

Direct Labour Payments

Clients can also pay labour charges directly ensuring a transparent process.

Our Role

We manage the entire execution, Coordinating labour and materials, With our fees covering only the execution process.

Execution Model ensures clear communication and transparency for clients with no hidden costs and full control over material quality making everything crystal clear and straightforward.
